# ABOUT THE PROJECT

We aim to cement the MetalShiba ecosystem  
as the first and most revolutionary project  
to connect the utility of a blockchain token with games and NFTs  
that directly contribute to independent comedy artists and their fan base.

Built on the foundation of a community of visionaries and multipurpose idea creators,  
we plan to see MetalShiba at the forefront of the evolution of decentralized finance (DeFi),  
being among the first platforms to be identified with the independent comic icon,  
entertaining its fan base with games and readings, and an NFT Marketplace  
that will bring many projects to life and support artists around the world.

# OUR UTILITIES

## COMIC BOOK

Metal Shiba Inu was born from the creation of a comic book that has as protagonist a superhero, it will be published every week, on a usual day at the usual time, in the section "Comics - Reading", precisely every Friday, until the conclusion of the story.

## NFT COLLECTION

As previously reported, as our cartoonists, writers and illustrators are established artists with several works behind them. We decided to create a collection of NFTs of Metal Shiba Inu characters. Our collection has been made by Hand, you won't be able to find it anywhere on the web or graphic software

## PLAY 2 EARN VIDEOGAME

Regarding the world of comics and nfts, we intend to create a video game that integrates the nfts purchased by the users and that allows to give a playful utility to the nfts

## DASHBOARD

We will have an NFT and token Dashboard available at launch. You can view the dashboard immediately after connecting the wallet. The Dashboard will give you valuable information about the token and your holdings. You'll also be able to view your MetalShiba NFTs and the ones you will buy in our marketplace. It is designed to be simple and easy to understand.

## MARKETPLACE

In addition to the art and comics, we created a functional NFT platform prior to launch so that we don't waste time making new collaborations on our launch page.

# THE OFFICIAL COMIC BOOK

Metal Shiba Inu was born from the creation of a comic book that has as protagonist a superhero, it will be published every week, on a usual day at the usual time, in the section "Comics - Reading", precisely every Friday, until the conclusion of the story. We will create, the paper version and promote it at the most famous comic book fairs.

As artists (writers, cartoonists, illustrators) we have chosen professionals in the field with several jobs behind them and who can guarantee a quality product: both in terms of the comic itself but also the NFT we will create.

Being subjects external to the world of the blockchain their works will be unique and there will be no other creations within the blockchain guaranteeing a real value consisting of the talent of the artist himself.

## MARKET ANALYSIS

the Japanese market, in 2020 grossed about 4 billion and 850 million euros with an increase of 23% compared to the previous year.

The value of our company is based precisely ongoing into expanding, unsaturated markets.

## COPIES DISTRIBUTION

Copies of our Official Comic Book will be available to read each week directly on our website, chapter by chapter.

To unleash full quality and watermark-free you'll need an OG NFT on Binance Smart Chain or a Hero Limited Edition collection on the Ethereum blockchain. With that in hand, you'll have access to a private cloud folder with the highest quality files.

# NFTs

We decided to create a collection of NFTs of Metal Shiba Inu characters. Our collection has been made by Hand, you won't be able to find it anywhere on the web or graphic software.

Our NFTs will be initially minted by Presalers and Token Holders, and the holders of this NFT will be sent the 1st press limited edition hard copy of the comic exclusively.

# NFT TOKENOMICS

## STEP 1

10% of the BNB from the NFT Sales will be given back to the community as giveaways and contests.

## STEP 2

10% of the BNB from the NFT Sales will be used to buy and then add the \$MSHIB tokens to the staking pools

## STEP 3

50% of the BNB from the NFT Sales will be added to the marketing wallet for future marketing

## STEP 4

10% of the BNB from the NFT Sales will be added to the DAO treasury wallet

## STEP 5

20% of the BNB from the NFT Sales will be given to developers, team, and artists.

# MARKETPLACE

## Intro

In addition to the art and comics, we created a functional NFT platform. Our minting page will initially be used to launch the MetalShiba Inu NFT OG collection. After that, the platform will be open to emerging artists, and projects related to comics and the NFT ecosystem, giving the market a true identity and targeted audience.

The goal is to create a vibrant community and share some of the profits from the marketplace directly with our NFT holders and stakers. This will be done directly from the smart contract and not from our hands.

Also, being a true Marketplace we will give the ability to sell and mint third-party NFT collections in a decentralized way. Giving the platform an independent role in the project ecosystem.

# MARKETPLACE

## How it works

Our marketplace is an easy-to-understand, lightweight platform. You will be able to view an entire collection, see the listed items in a collection, see the attributes of a particular NFT, and the highest price or bid.

Marketplace supports a multitude of options for your NFTs.

**Fixed Price** - Allow your item to be bought immediately at a fixed price.

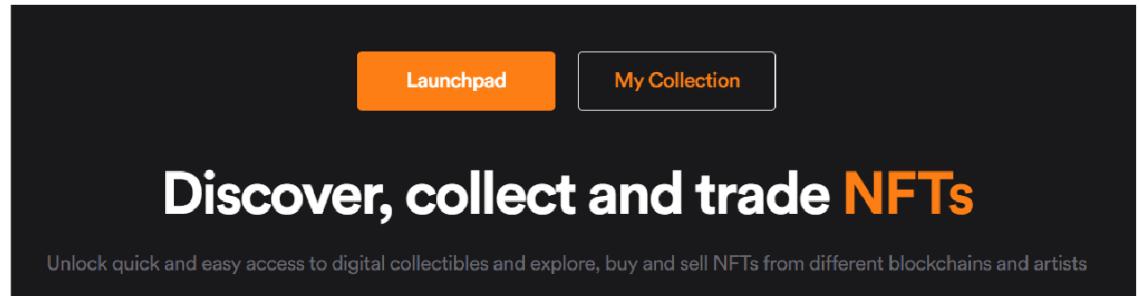

**Auction** - Allow your item to be bought via the highest bid within a fixed time frame and set a price floor.

**Decentralized Launchpad** - Allow your NFT collection to be minted by everyone. You'll only need to set up the sale page and pay a service fee. We allow one sale per timeslot.

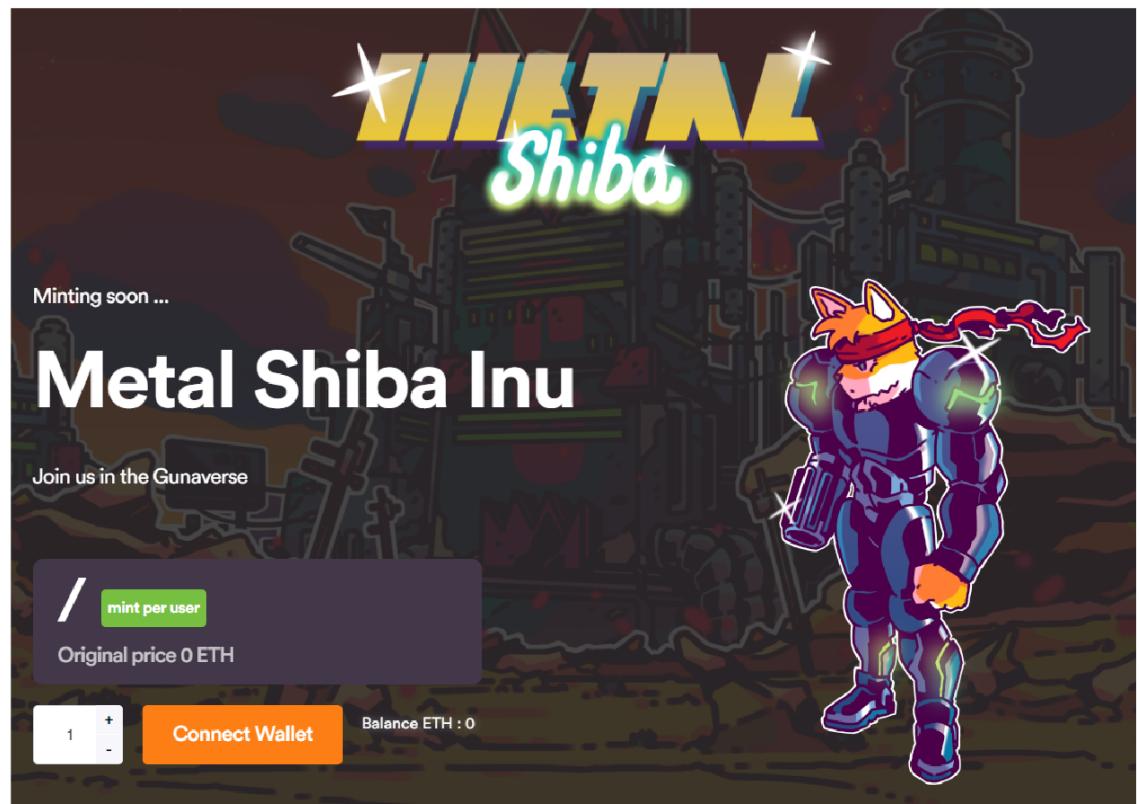

**Collection Listings** - Allow your collection to be bought and explored from our marketplace, there will be some criteria to become eligible, but the process will be decentralized directly from our smart contract.

**NFT Staking Service** - We allow the third-party projects to apply and reserve one of our NFT Staking pools, to access our liquidity providers and leverage their collection volumes thus rewarding their loyal investors. Pools can pay rewards in any BEP20 token that the team will choose.

**Verification** - For greater credibility, MetalShiba Inu also offers verification on collections. This is available for established projects and will allow the collection items to be featured on the MetalShiba Inu landing page.

The screenshot shows the homepage of the MetalShiba Inu marketplace. At the top, there are two buttons: "Launchpad" (orange) and "My Collection" (white). Below them, a large heading reads "Discover, collect and trade NFTs". A subtext below the heading says "Unlock quick and easy access to digital collectibles and explore, buy and sell NFTs from different blockchains and artists".

This screenshot shows the "Minting soon ..." section of the MetalShiba Inu website. It features a large, stylized logo with "METAL Shiba" and a futuristic cityscape background. On the right, there's an illustration of a robotic dog wearing a helmet and holding a sword. Below the logo, the text "Metal Shiba Inu" is prominently displayed. A button labeled "Join us in the Gunaverse" is visible. At the bottom, there's a purple button with a slash icon and the text "mint per user", along with a counter showing "1" and a plus/minus sign. To the right of the counter, it says "Original price 0 ETH". There's also a "Connect Wallet" button and a "Balance ETH : 0".

# PLAY 2 EARN VIDEOGAME

Moreover, regarding the world of comics and nfts, we intend to create a video game that will integrate the nfts purchased by the users and that will give a utility to the nfts. We propose a video game that will be closely related to the story of our comic and that will bring the latter in the form of a ludic experience. Every comic/manga has developed a value in the gaming world, like Dragonball or the world of Marvel with the different chapters reproduced in the gaming platforms.

It will be a top priority to create this video game as it will allow a more appropriate use of the nft, a promotion for the comic itself and a blazon that will cover
